Information for our guests

Kruijd family

Media

1. **Internet** is normally more than 200 Mbps, if you can't do that on wifi, plug your laptop into one of the ethernet ports (for macBooks there is an adaptor).
2. **Wi-Fi** is already logged in on the Boerderij-Pad; look at settings for the password. You are in HetSpoel-Boerderij and the code is Qw5Rm80#
3. We offer **streaming services** HBO, NL Ziet, YouTube and Netflix ad-free on both TV and the Boerderij-Pad. You can easily stream to the TV or watch directly on TV or iPad. The TV is a smart TV: press Home and work with arrows and the enter button for navigation. Select Hooiberg at HBO, NLZiet and Netflix. If these apps are not used for a while, they are automatically logged out. We will fix that quickly if you call. Don't sit on the settings yourself, just call!
4.
5. On our web site you will find booklets from the Culemborg Society for History: AWK Voet van Oudheusden. You may be able to translate some of it using a translator app (camera).
6. Physical **manuals** of appliances are in a basket in the bar..
7. Scattered throughout the house are all kinds of **books** and games that you can use. You can bring leaflets with you.
8. There is a thick book about the Dutch Waterlines and a Gouden Boekje , with up to three images that can be found within walking distance. Can you do that too?

Bedrooms

1. The large open attic has a normal **double** bed and a somewhat smaller sofa bed suitable for 2 people. We will make it up in consultation or not. If desired, we place a room screen for a little more privacy. On the first floor there are two single beds.
2. The **beds** are made.
3. The smoke detectors hang above the bed and in the hallway. We also sometimes actively mease it and then realise that it is necessary to ventilate.
4. There is a mobile **air conditioner** in the attic, but our own experience is that heat can often be easily controlled with the windows. Throw the hose out of the window, carefully set the air conditioning high and place a bucket under the drain. Feel free to use the air conditioning during the day; we have green, our own generated electricity.
5. There is an electric **heater** on green energy. There is a switch on the back and the remote control has two buttons that matter: a flame to make it warmer and softer and the switch for mood light. It doesn't necessarily get warmer when you increase the temperature.
6. The ceiling **lights** in the bedrooms can change their ambiance with the Hue remote controls; the round for the bed and the elongated for the sofa bed. Do not use the main switch.
7. There are periods with **mosquitoes**. You can hang the mosquito nets yourself if they are not yet hanging. They are next to the sink.
8. There are **extra** pillows, rugs and duvets.

Kitchenette

1. On the spaceous **loft** there is a kitchenette, a limited opportunity to prepare and consume simple meals.
2. There is a sink and a shelf where you can cook to a limited extent with a two-burner electric **hob**, which is under the sink. Press the button in the centre of the sink to let the water stand.
3. **Coffee and tea** are in the sink cabinet for the first need, and oil, pepper, salt, sugar and coffee milk powder. There is also a combi microwave, Sodastream, citrus press, Nespresso machine and kettle.
4. The combi **microwave** is also a grill and an oven with which you bake sandwiches, click on convection, twice on the up arrow and set the time. Then press start.
5. **Glasses and plates** can be found in the low cabinet under the oven, in which a user manual can also be found. Coffee cups, Belgian beer glasses and beautiful steel wine goblets are at the dining table.
6. There are 4 **chairs** at the dining table. Downstairs and in the children's bedroom you will find more. There is room for a light breakfast but real dining is a bit cramped in the attic.
7. The **refrigerator** is quite small and has a freezer.
8. If you need **other** things, such as vacuum cleaners, food processors or tools, we will do our best to take care of them.

Bathroom and toilets

1. On the first floor is a **bathroom** with bath, sink and shower. There is a separate **toilet**. There are 2 towels per person and there is Rituals shampoo, conditioner and shower gel.
2. The ceiling **lights** in the bathroom and landing can change the mood with the Hue remote controls. The ceiling light in the bathroom switches automatically.
3. The shower **drain** is cleaned by us after each guest. If you have long hair or stay longer, it is wise to keep an eye on whether the water drains well; the drain is shallow (to be able to get rid of it better).
4. The **ventilation** of the bathroom switches remotely controlled; put it on car and if the sound bothers you, turn it off and open the door.
5. At the entrance downstairs is a second **toilet**. If we also stay in that part of the house ourselves, that is for ladies but that does not necessarily apply to our guests.
6. There are 2 **rolls** of toilet paper per toilet.
7. We change the **towels** on request, as with longer stays.
8. We can possibly do the **laundry** for you. Please do not do that in the sinks to keep the wood well.

House rules

1. No **smoking**, not even in the vicinity of the accommodations, because of other guests and neighbours.
2. Call us if you want to **check out**, otherwise we will contact you at 11am to say hello. If we are not there or do you want to leave early, do you put the key in the key cabinet?!
3. We **clean** the accommodation but please don't make it dirty... (preferably shoes off, at least if they are dirty or have hard soles).
4. **Waste separation** is mandatory in Culemborg. Never flush food residues down the sink (it will definitely clog) and do not mix in other bins or leave them in packaging. Take it with you or throw it in the green bin.
5. You can stay **freely** in the yard, both at the playground with lounge sofa and on the Spoelweide. Put everything back where you found it and take into account the neighbours and other guests (noise and smoke).
6. If something breaks, you miss something or it is unclear how something works please **say it** right away, often something can be done about it quickly!
